

QCE POLICY STATEMENT

YRG Group Ltd, has built its market reputation by consistently meeting the quality and service requirements of its customers.

The company regards its Quality, Colour, Environmental as an integral part of the overall business strategy, which will ensure that customer requirements are continually met. This will be achieved by setting appropriate, measurable objectives throughout the Company.

- *Customer Focus, providing a high level of quality and service to our customers that meets and, when possible, exceeds requirements and in line with all applicable regulations, legislation and standards.*
- *We are committed to conducting our operations carrying out our services in a manner that protects the environment of our employees, our customers and other interested parties.*
- *To train and develop our employees to ensure that Quality, Environmental requirements are met.*
- *Implementing a process of continual improvement to our organisation and QCEMS system so they will deliver, with emphasis being on avoidance rather than purely detecting problems.*
- *From the outset it is our intension to design out waste. We will work to protect and conserve natural resources by reducing our waste generation and minimising waste discharge to the air, water and land. We will ensure that wastes we generate are disposed of in safe and environmentally sound ways.*
- *The organisation will manufacture all products and services to a safe and legally compliant standard and to the specified quality.*

12647 Colour Compliance

- *YRG Repro ensures that the colour quality policy represents the quality policy as far as the colour quality system is concerned.*
- *YRG Repro is using the BPIF Colour Quality Management Certification Scheme Requirements version 3 for the implementation of the scheme where applicable.*
- *YRG Repro is using the ISO standard 12647 and the flexographic plate making process as the method of production within the scope of the certification. The 12647 procedures are used to demonstrate compliance.*
- *YRG Repro's aim is to ensure customer satisfaction through accurate colour reproduction and consistent quality against calibrated proofs for all jobs produced to the ISO 12647 standard.*
- *YRG Repro ensures the training, development and maintenance of the competence of all personnel within the scope of the colour quality and the production management system.*
- *YRG Repro ensures the provision of the necessary infrastructure and equipment needed for the production of compliant products.*
- *YRG Repro undertakes reviews on a regular basis of the capabilities of the infrastructure and equipment employed in the light of technological and other changes as they become available.*
- *YRG Repro ensures the policy detailed above is communicated within the business and made available all interested parties on the YRG Website for download.*

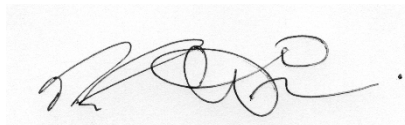

In line with the organisation's objectives and goals, the YRG Group Ltd, is committed to aligning its operations with the requirements of the following standards:

- The BPIF colour quality management certification scheme V3 – November 2017
- ISO 9001:2015 The International Quality Management System Standard
- ISO 14001 :2015 The International Environmental Management System Standard

YRG Group Ltd, Management will ensure that all employees are aware of the requirements of the Quality, Colour, Environmental Policy and the associated management system requirements.

This policy together with objectives will be reviewed periodically to ensure their compatibility with the company's overall business objectives, and available to all interested parties.
